

Prof. **Maria Camilla Bergonzi** is associate professor at the University of Florence. She has a deep knowledge in the improvement of bioavailability and technological features of bioactive molecules from plant matrices and drugs by using conventional and innovative drug delivery systems. Her studies are concerning the preparation of delivery systems able to cross the blood-brain barrier and to promote the oral absorption. She is titular of Course of Pharmaceutical Technology and Legislation for ungraduated students of degree course in Pharmacy and co-titular of the course Soft Matter Materials Applied to Drug Delivery Systems, Food Supplements and Cosmetic Sciences, for the master degree in Advanced Molecular Sciences.
