

Silvia Bodoardo is professor of Chemistry at Politecnico di Torino. Her research activity in the Electrochemistry Group is mainly focused on the study of materials for Li-ion and post Li-ion batteries, i.e. Li-S, Li-air. She is participating in several EU funded projects (coordinator of STABLE project) and also national and regional ones. She is leader of WP3 on Education in Battery2030+ initiative and is co-chair in WG3 of BatteRlesEurope. Silvia organized many conferences and workshops on materials with electrochemical application and was Chair woman at the launch of the Horizon Prize on Innovative Batteries.
