

Bruno Botta is full professor of organic chemistry at the "Sapienza" University of Rome. Since 2014, he is Deputy Rector for the Internationalization at the same university. In 2012, he cofounded the Molecular Links Rome (MoLiRom s.r.l.), a spin-off Company of Sapienza University of Rome involved in the synthesis, extraction and production of bioactive secondary metabolites. His research interest is centered in organic chemistry, with a particular focus in the fields of natural products chemistry. He is author of 190 publications, including 10 patents (4 national and 6 international – USA and Europe). He is author and co-author of 10 books.
