

Dr. Maurizio Casalino earned a PhD in electrical engineering from University "Mediterranea" of Reggio Calabria, after a Laurea (summa cum laude) in electrical engineering from University of Naples "Federico II".

In the 2010, he joined as researcher the Institute of Applied Sciences and Intelligent Systems in Naples. He is currently contracting Professor of physics of the semiconductors and devices and analog electronics of University of Campania "Luigi Vanvitelli".

His research interests, funded by CNR, public and external organizations and European Community, include the design, fabrication, and characterization of photonic devices.
