

Dr Caroline CELLE received her PhD in 2005 from the University C. Bernard of Lyon (France) in the field of polymer chemistry. Subsequently, she joined as a researcher the CEA/LITEN in the Laboratory of Synthesis and Integration of Nanomaterials. She is CEA senior expert since 2018. Her current research interests are focused on synthesis, characterisation and integration of nanomaterials into functional devices for new generation of high performance electrodes. She has been in charge of several national, industrial and European projects. She is the head of the Materials Laboratory of the Battery Technology Department of CEA LITEN in Grenoble since 2020. She is author and co-authors

of 40 publications in peer-reviewed journals and 23 patents.
