

**Vito Di Noto** is Full Professor of Electrochemistry for Energy and Solid-State Chemistry in the Department of Industrial Engineering of the University of Padova, where he heads the Section of Chemistry for Technology and leads the group *“Chemistry of Materials for the Metamorphosis and the Storage of electrochemical Energy – CheMaMSE”*. He is *“Fellow of The Electrochemical Society”*, Fellow of the Japan Society for the Promotion of Science (JSPS) and President of the Electrochemistry Division of the Italian Chemical Society. His world-class expertise in the research and development of advanced functional materials for electrochemical energy conversion and storage devices, including primary and secondary batteries, fuel cells and redox flow batteries is witnessed by a publication record comprising over 311 papers and 30 patents. His h-index is 48, with more than 7700 citations.
