

Antonio Ferraro received the bachelor degree in Material Science and the master degree in Science and Engineering of Innovative and Functional Materials from the Physics Department of University of Calabria, Rende, Italy, in 2009 and 2012 respectively. He received the Doctoral degree in Physical, Chemical and Materials Sciences and Technologies in the same department in 2017. Until 2019 He was research fellow at the Institute for Microelectronics and Microsystems (IMM), Italian National Research Council, Rome, Italy. Now He is research fellow at the Physics Department of University of Calabria. During the master thesis he was intern at Philips Research Campus in Eindhoven, The Netherlands, for six months under the supervision of Dr. Dick de Boer, where was involved in nanostructured luminescence materials project. His research interests include, plasmonic structures, nanostructured materials, terahertz devices, liquid crystalline composite devices with particular focus on fabrication and characterization.
