

M. Garofalo got a PhD in Biochemistry and Cell and Molecular Biology in 2015, with co-supervision from the University of Naples (Italy) and the University of Helsinki (Finland). Since then, she has advanced from the position of postdoc researcher, firstly at University of Helsinki and subsequently at University of Milan in collaboration with IRCCS Istituto Nazionale dei Tumori (INT), to research assistant professor at University of Padua. Her current research is focused on the definition of tools and techniques to improve the delivery of drugs using oncolytic viruses and extracellular vesicles in particular.
