

**Cosimo Gerardi** is head of PV technology development at the 3SUN unit of Enel Green Power in Catania (Italy). He directs the activities of technology development and implementation in the 3SUN factory. From 1990 to 1997 he was a researcher expert in semiconductor physics at Centro Nazionale Ricerca Sviluppo Materiali (Italy). From 1997 to 2007 he worked at the Central R&D of STMicroelectronics as Device Engineering Manager, coordinating the development of nanoscale semiconductor devices. From 2008 to 2010 he has worked at Numonyx-Micron as senior manager of the CMOS Device Physics of Technology Transfer of advanced solid state memory devices. From 2011 to 2015 he has worked as senior manager of PV R&D in STMicroelectronics. From 2015 he has been working in Enel Green Power. He has coordinated several national and international cooperative R&D programs. He is author and co-author of more than 200 published works as papers, conference proceedings, book chapters and patents in the field of semiconductors and photovoltaics technology.
