

**Omar Perego**, graduated in 2000 in Mechanical Engineering from the Milan Polytechnic (Italy), has been in RSE since 2001. He is project manager of a 4 M€/year national project on materials and technologies of storage systems. In 2019 he obtained a Master in science communication and sustainable innovation. He is an expert in distributed energy systems, renewable energy sources and cogeneration. He is a member of the research committee of the National Energy Technology Cluster (CTNE) and contact person in the “Smart Energy System” area of the Lombardy Energy Cleantech Cluster (LE2C).

He actively participates in several European initiatives on electrochemical storage systems, including ETIP Batteries Europe, ETIP-SNET, Batteries European Partnership Association, European Battery Alliance, EERA JP Energy Storage.
