

## **Evgeniya Peshkova**

Doctoral degree in Chemistry at Moscow State University (Russia) and PhD in Biophysics at University of Genova (Italy), she is Researcher at the Department of Experimental Medicine, University of Genova. She works at Laboratory of Biophysics and Nanotechnology, her main research interests are structural proteomics, nanocrystallography, Langmuir-Blodgett protein nanofilms and multilayers studied by X-ray diffraction and scattering at synchrotron. She worked in following institutions:

- Moscow State University, Russia,
- Biodesign Institute, Arizona State University, USA,
- European Synchrotron Radiation Facility (ESRF), France.

Her teaching activity at UNIGE includes lectures on Structural biology and Nanotechnology, at Master Degree course “Medical-pharmaceutical Biotechnology” (in English).
