

Francesca Russo hold a fellowship at ITM-CNR (Rende,CS) and she is a PhD student at “Science and Engineering of the Environment, Constructions and Energy, SIACE” at University of Calabria. She previously completed a M.Sc. in 2016 at University of Calabria. She recently received a scholarship from NAWA, National Agency for Academic Exchange in Poland. She is currently member of European Membrane Society (EMS) and guest editor for the Polymers Journal for the Special Issue "Emergent Materials for Membrane Preparation: from Circular Economy to Environmental Sustainability". Her research interests are mainly in the fields of sustainable membrane preparation and characterization using green solvents and innovative polymeric materials for water treatment applications.
