

After medical degree, Dr. Nadia Salerno started her fellowship in Cardiology at Magna Graecia University in Catanzaro (Italy) in 2012. During residency, Dr. Salerno has grown a natural interest in cardiovascular imaging, with a significant attitude in advanced ultrasound technique, both in clinical practice and basic research. In 2018 Dr. Salerno completed her training in echocardiography with a Observership at The Mount Sinai Hospital in New York and a second-level University Master Degree. Dr. Salerno is actively collaborating in several clinical and basic research studies in which her ability in cardiovascular imaging is of paramount importance and certified by several manuscripts published in prestigious peer-reviews journals.
