

Mariangela is currently a Post-Doc Fellow in the Molecular and Cellular Cardiology Laboratory at the University Magna Graecia (UMG). She obtained the M.Phil. Degree in “Molecular Medicine and Biotechnologies” in 2008 and her M.Sc. Degree in Biotechnology in 2011 at the UMG. In 2015, she obtained the Ph.D. degree in Biomedical Engineering at the UMG. Her current research interests span from the fields of molecular and cellular biology to laboratory methods for clinical pathology and biochemistry. She focuses her main activities in the phenotypic characterization of cardiac stem cells from the adult heart using FACS analysis, rt-PCR, immunohistochemistry and immunocytochemistry.
