

I graduated in Pharmacy (academic year 2017/2018) at the University of Calabria, Arcavacata of Rende. Currently I'm a PhD Student, attending the second year of the PhD Program in Molecular Oncology and Translational Oncology at Laboratory of Stem Cells Biology, University "Magna Graecia" of Catanzaro, under the guidance of Professor Giovanni Cuda. My research is mainly focused on the study of the molecular basis of complex diseases by using the iPSCs in vitro modelling approach.
