

Dr. **Alessandro Villa** is member of the research staff at the Prof. Ciana's Lab, Department of Health Sciences (DiSS), University of Milan. He worked as a postdoctoral research associate at the Italian National Research Council, at the European Space Agency, The Netherlands, and at the University of Milan, Italy. His research is focused on molecular imaging, ranging from the identification of novel biomarkers to the development of probes for the early diagnosis of cancer and neurodegenerative diseases. Recently he was involved in the implementation of autologous extracellular vesicles as a delivery system for diagnostic molecules in preclinical models of cancer.
